

德保苏铁——中国苏铁一新种*

CYCAS DEBAOENSIS Y. C. ZHONG ET C. J. CHEN

——A NEW CYCAD FROM CHINA

Key words *Cycas*; *C. debaoensis* Y.C.Zhong et C.J.Chen; Guangxi, China

关键词 苏铁属; 德保苏铁; 中国广西

德保苏铁 新种

Cycas debaoensis Y. C. Zhong et C. J. Chen, sp. nov.

Cycas multipinnatae C. J. Chen et S. Y. Yang affinis sed frondibus 7~11, 1.5~3.5 m longis, pinnulis fasciariis, apice longe acuminatis, ovulis persaepe 4, segmentis laminarum megasporophyllarum usque ad 50, filiformibus differt.

本种苏铁与多歧苏铁 *Cycas multipinnata* C. J. Chen et S. Y. Yang 相似, 但叶 7~11 片, 长仅 1.5~3.5 m; 小羽片带形, 先端长渐尖; 胚珠常 4 枚; 大孢子叶不育顶片的裂片丝形, 多达到 50, 明显不同。

Guangxi, China: Debao(德保), 106°14'E by 23°30'N, alt. 850 m, in sparse shrub and small tree forests on sunny open slopes of limestone hills, 1997-08-27, Y. C. Zhong (钟业聪)8762 (holotype, PE; isotype GXF).
